

COMPREHENSIVE STAIN REMOVAL KIT AND METHOD

ABSTRACT OF THE DISCLOSURE

A comprehensive stain removal kit includes various cleaning formulas, rinses and a super absorbent cloth for a regimen of stain removal. A stain removal guide is included to provide a stain removal regimen based on a stain and fabric classification. Cleaning formulas and rinses are alternately applied to the fabric in the presence of the super absorbent cloth in combination in accordance with a specified stain removal regimen. The cleaning formulas and rinses are absorbed into the super absorbent cloth with the stain material to completely remove stains, including combination stains. The kit is provided as a portable packet easily used or stored in a variety of locations where stain removal may be desired.
